PROFESSIONAL PROFILE

Electronic Engineer with a Master's degree in Automation, with over 6 years of experience in Data Science / IA - ML models / computer vision and 5 years as a Full Stack Developer. My passion for research and continuous learning drives me to seek new challenges and opportunities for professional growth.

I have successfully led projects in data analytics, modeling, and prediction, and have implemented cutting-edge machine learning solutions. My experience as a Full Stack Developer includes end-to-end web application design and development, from planning and architecture to implementation and testing.

With a strong foundation in autonomous learning, I stay at the forefront of the latest trends and technologies in my field. I am deeply motivated to continually expand my knowledge and skill set, ensuring that I deliver innovative and effective solutions.

SKILLS

- Strong expertise in machine learning, data analysis, and solutions design.
- Advanced knowledge of computer vision and artificial intelligence.
- Advanced knowledge in AWS services, design and implementation of cloud solutions.
- Proficiency in software development, robotics, and digital signal processing.
- Advanced knowledge of relational and non-relational databases.
- Fluent Spanish | Intermediate English (B1).
- Flexible and adaptable to new technologies and methodologies.
- Strong problem-solving, analytical, and teamwork abilities.

EDUCATION & QUALIFICATIONS

University of Valle

Colombia, Cali

- Master's degree in engineering with emphasis on automation.
- Academic average: 4.6/5
- Research work: "Forecasting of the standardized precipitation index (SPI) in the region of Nariño using artificial intelligence techniques".
- Professional subjects: optimization of dynamic systems, optimization of linear systems, intelligent control, artificial vision, modern techniques for pattern recognition and techniques for time series forecasting.

University of Valle

Colombia, Cali

- Electronics Engineer.
- Academic average: 4.19/5
- Final project: "Development and implementation of a tool for physical therapies in patients with restricted mobility in upper limbs"
- Professional subjects: Mobile robotics, Integration of systems for automation, Programmable Logic Controller (PLC), User interfaces, Neuronal networks, Artificial vision.

INEM Jorge Isaacs High School

Colombia, Cali

- Industrial High School, specialty Electricity and Electronics.

PROFESSIONAL EXPERIENCE

January 2022 – Now

Colombia, Cali

Company: Subocol S.A.

Role: Artificial Intelligence Specialist.

Achievements:

- Development and implementation of AI models for automotive insurance data.
- Improvement and implementation of existing IA services.
- Statistical analysis of data.
- Research and development of AI models.
- Web services implementation.

May 2016 - February 2022

Colombia, Cali

Company: Ipinnovatech Ltda.

Role: Senior Development Engineer.

Achievements:

- Design and implementation of web applications (responsive) that allow to manage and consult different databases.
- Web services implementation.
- Server management.
- Research in artificial intelligence using convolutional networks convolutional networks for object detection.
- Implementation of algorithms in artificial vision.

February 2019 - January 2023

Colombia, Cali

Company: University of Valle

Role: Research assistant.

Achievements:

- Implementation of algorithms in artificial vision.
- Development and implementation of algorithms using python for data extraction using satellite images for environmental use (drought forecasting) for different study areas of the country.
- Use of clustering methods for the identification and characterization of spatially homogeneous precipitation regions.
- Use of artificial intelligence techniques for dimensionality reduction in precipitation data and drought indices.

June 2019 - June 2020

Colombia, Cali

Company: University of Valle

Role: Teaching assistant.

Achievements:

- Teaching a master course on basic electronics for electronics technology students.
- Teach electronic instrumentation laboratory for electronic engineering students.

February 2016 - March 2017

Colombia, Cali

Company: University of Valle

Role: Research assistant.

Achievements:

- Implementation of algorithms in artificial vision.
- Development of routines for movements of the humanoid mobile robot NAO, using Python.
- In the next links show two test of the behavior of the NAO robot when the robot imitate a human movements.

<https://www.youtube.com/watch?v=NT2LTXGOLJE>

COMPETENCES AND COMPLEMENTARY TRAINING

Languages

English: B2 Colombo – Americano Cultural center.

Colombia, Cali

San Buenaventura University

Course of MS.NET. 40 hours.

Colombia, Cali

CERTIFICATIONS

AWS Certified Cloud Practitioner
